

DISPLAY SCREEN EQUIPMENT ASSESSOR TRAINING

INTRODUCTION

Regular display screen use can lead to upper limb disorders, musculoskeletal disorders, eye fatigue and subsequent mental stress. These often take years to progress and are usually chronic in nature meaning treatment is lengthy and often costly. This course has been designed to benefit managers, supervisors and all display screen users through a combination of theoretical and practical training in carrying out DSE assessments.

WHO SHOULD ATTEND

This course is for all nominated employees and supervisors who work in an office and are required to meet the statutory obligations under Health & Safety at Work Act.

COURSE DURATION

PFA Consulting offer this course over 1 day.

COURSE OVERVIEW

All who attend this course will receive the Display Screen Equipment Assessors Safety Certification and the course content includes the following:

- Understand the DSE Regulations
- Ergonomics, Equipment Requirements & Working Patterns
- Early Symptom Recognition
- Identifying the Hazards
- DSE Work Assessments

COURSE BENEFITS

Display screen disorder sufferers can require lengthy absence and can be left with physical limitations after treatment. Due to the severity of this type of injury associated costs are high, both in terms of personal loss to the injured employee, and to the organisation. Once proficient at DSE Assessment, staff are able to conduct accurate assessments and identify opportunities for improvement to equipment layouts and employee posture and technique. Where improvements lead to the procurement of alternative equipment, with the help of accurate assessment, managers are in an informed position when budgeting for replacements. Reducing physical and mental stress in staff leads to increased productivity and reduced staff absence levels decrease. The training supports organisations in meeting their legal duties.

PFA Consulting has a rolling schedule for Health and Safety courses. For further details on this course or to arrange a meeting to discuss your requirements:
