

# MOBILE TOWER SCAFFOLD

## INTRODUCTION

A large percentage of accidents happen from falls so it is not surprising that companies are demanding only certificated operators be allowed to use such equipment on their premises/site.

This course provides excellent training for those required to undertake mobile tower scaffold operations and provides delegates with competencies to select, erect, use, strike and inspect a mobile tower safely. The course is predominantly practical with additional theoretical sessions.

## WHO SHOULD ATTEND

This course is essential for persons who use scaffolds regularly in their line of work and for site managers responsible for employees working from a scaffold.

## COURSE DURATION

PFA Consulting offer this course over half a day.

## COURSE OVERVIEW

The course, which is part theory and part practical, involves:

- Classroom based training on the safety issues whilst working at height either from towers, ladders or steps.
- Practical training in the erection and dismantling of portable towers.

---

PFA Consulting has a rolling schedule for Health and Safety courses. For further details on this course or to arrange a meeting to discuss your requirements:
