

# RISK ASSESSMENT TRAINING

## INTRODUCTION

This course explains the risk assessment process in detail. The course takes a pragmatic approach to risk assessment and teaches hazard recognition skills, hazard analysis techniques and concentrates on hierarchical risk control methods.

The course also gives delegates an insight into employer's and employee's legal obligations in risk assessment and demonstrates the likely outcomes when things go wrong, which may include personal injury, criminal charges, uninsured losses and poor publicity.

## WHO SHOULD ATTEND

This course is for employees in the workplace who are involved in Risk Assessment to meet statutory obligations under the management of Health & Safety at Work regulations 1999.

## COURSE DURATION

PFA Consulting offer this as a 1 day course.

## COURSE OVERVIEW

- Health & Safety at Work
- Hazard spotting and risk identification
- Risk Analysis
- Risk elimination or reduction
- Preparation of a risk assessment and the ability to implement sensible control measures
- Practical Risk Assessment in the Workplace
- Management of Health & Safety

## COURSE BENEFITS

Properly trained employees go on to effectively reduce and manage the hazards staff may be exposed to which achieves many benefits including a combination of legal, moral and economic benefit. Reduction in accident rates and good safety performance will promote good business and reduces the threat of employee injury and absence with the associated costs, poor publicity, reduced productivity and loss of orders. Key benefits of hazard recognition and hazard management can lead to reduced insurance premiums, reduced risk of prosecution and a positive, well motivated workforce.

PFA Consulting has a rolling schedule for Health and Safety courses. For further details on this course or to arrange a meeting to discuss your requirements:
