

## PROJECT MANAGEMENT/ CONSTRUCTION SUPERVISION

From preparing tender documents to on-site supervision and final handover, PFA Consulting is well experienced in Project and Contract Management.

In recent years, we have managed many infrastructure projects across the length and breadth of the country, tailoring requirements to the individual needs of the client. So whether you require us to prepare initial cost estimates, prepare tender documents, manage the contract or provide on-site supervisory roles, PFA Consulting can supply the service you need.

We are experienced in preparing and administering contracts using the standard formats such as the Institution of Civil Engineers' Conditions of Contract and the Engineering and Construction Contract. Our fully trained and qualified staff will liaise closely with the client, designers, local authorities, service companies and regulatory bodies to ensure the work is completed to everyone's satisfaction.

### PROJECT EXAMPLE: NORTH CALNE, WILTSHIRE

PFA Consulting designed and prepared contract documentation for the road and drainage infrastructure of the major town extension of North Calne. Highway works included a 3km Northern Distributor Road linking the A4 to A3102, 4 roundabouts, 5 ghost island junctions, 2 mini-roundabouts and residential access roads. Strategic drainage design included 2 large surface water storage ponds with associated landscaping. PFA Consulting acted as the Resident Engineer and supervised all road and drainage works.

- feasibility studies and route selection
- engineering input to planning applications
- expert witness representations
- transport planning
- strategic drainage design
- engineering design of works
- contract management
